I. Basis of the report

1. With regard to the elements of the international application:*

- the international application as originally filed.
- the description, pages , as originally filed,
 pages , filed with the demand,
 pages , received on with the letter of
- the claims, pages , as originally filed,
 pages , as amended (together with any statement) under Article 19,
 pages , filed with the demand,
 pages , received on with the letter of
- the drawings, pages , as originally filed,
 pages , filed with the demand,
 pages , received on with the letter of
- the sequence listing part of the description:
 pages , as originally filed
 pages , filed with the demand
 pages , received on with the letter of

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language which is:

- the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
- the language of publication of the international application (under Rule 48.3(b)).
- the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, was on the basis of the sequence listing:

- contained in the international application in written form.
- filed together with the international application in computer readable form.
- furnished subsequently to this Authority in written form.
- furnished subsequently to this Authority in computer readable form.
- The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

4. The amendments have resulted in the cancellation of:

- the description, pages
- the claims, Nos.
- the drawings, sheets/fig.

5. This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**

* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).

** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims 1-23	YES
	Claims	NO
Inventive step (IS)	Claims 1-23	YES
	Claims	NO
Industrial applicability (IA)	Claims 1-23	YES
	Claims	NO

2. Citations and explanations (Rule 70.7)

D3: Woodcock JM

Explanations: The aim of the current application is to find a simultaneous antagonist of GM-CSF, IL-3 and IL-5, where all three act through a common receptor subunit (β c).

Communal subunits cannot bind to cytokines by themselves thus finding structural data on the binding site is difficult. To overcome this problem the applicants have developed a monoclonal antibody against a region, which is important for cytokine binding within domain 4 of the common beta chain. The applicants can now crystallise the binding site and determine the structure of the D4 β c domain of the receptor bound to an antagonist.

D1 describes a compound or agent that binds to the cytokine receptor of F'-G' loop of Domain 4 of the β c chain receptor for GM-CSF, IL-3, IL-5. This differs from the current application, which defines the actual binding domain, not the agent that binds to it.

D2 This document reviews the work on cytokines to date and suggests that the B'-C' and F'-G' loops in the fourth domain are involved in ligand recognition and binding. It recognises the major role taken by the tyrosine residues in these domain 4 loops. It does not however disclose the binding domain of the current application.

D3 This document discusses the importance of the F'-G' loop but not the binding domain of the current application.

Therefore, it is considered the claims of the current application are novel, inventive and industrial applicable.
